

Keepoint Crack + [Latest]

When keeping web pages, you need to be able to find them quickly - or you need to be able to save them for re-reading. That is why Keepoint Free Download shows all the information about the webpage you are reading in one easy, centralized location. Keeping the bookmarks you create in Keepoint allows you to access them in the same place again and again. The "Workspace" in Keepoint is the place where you create your "bookmark set" or

your "favorites". You save your search results, and everything else in it, in the "library". You can re-open the library at any time and browse the information available. After saving web pages, or bookmark sets, or collections, you can easily attach notes to them. Keepoint does not use your computer's hard disk for memory; it stores all its information in a relational database. Any object (url, video, document, etc) you save (store) is a relation (row) in this database. This allows you to add your personal comments to your objects or "bookmarks". The "Library" can easily be expanded to provide room for more objects. To save information and/or objects you need to add this information

to your favorites or to a "Bookmark Set". A "Bookmark Set" consists of a number of webpages, e.g. you can create a "Webpage Set" in order to save all your webpages from a certain domain. You can also create a "Saved Entry Set" which consists of an item, a webpage, an image, a document, a video or a link. Keepoint Features: Using the application's integrated search engine, it is easy to search the Internet by keywords. With the "Find" function of Keepoint you can provide key words and when a match is found (bookmark found), the website address will be highlighted. You can then select the corresponding object and attach a comment. By using the "Favorites" function of Keepoint you can create a list

of "favorite" webpages, link collections or bookmark sets. These "favorites" can be used to access the corresponding objects. Keepoint has an integrated text-editor which allows you to edit existing texts. You can add a comment or attach other items to text objects (URL, email address, image files, search results, etc.) You can use the bookmarking service of Keepoint to attach lists of webpages to a domain, to a certain

Keepoint For Windows

Write a book, a report, a letter or organize your web research. Just browse through our web pages and save your searches. Your data will stay safely in Keepoint

Serial Key. You won't need to ask others for additional information, transfer data on paper or copy/paste. Just tap Ctrl + spacebar to recall your searches and easy find it at any time. search tool, a note manager, a task manager, language translation, a complete dictionary, a built-in web crawler, etc. It supports the function of syncing data between computers, and allows you to share your saved searches and notes with other members of your team. 16. Keepad is the network version of Keep

What's New In Keepoint?

Keepoint is the web-based information management and web search engine specifically designed to save, organize, and apply your web research in a fun, easy, and powerful way. Fully supported by the 21+ millions people who are active on the internet, Keepoint provides a new

way to work with your valuable web research. Keepoint helps to organize the vast information available on the web into one convenient, easy to use place.

Keepoint is also an easy to use web content catalog, showing content classified in various categories (e.g., Nature or Scandals). Each piece of content is associated with a photo, a screenshot of the web page where the content is located (if available), or its title, url, and body. Keepoint allows you to save and annotate your web searches with tags, titles, links and notes. The results of your search are then organized into a unique space, you can share your search with friends and colleagues and work effectively on an unlimited set of

pages. Keepoint power comes from the unique set of tools - Keepad and Keepad Pro - that enables Keepoint users to effectively annotate their content, making it into a multi-media document. Keepad allows you to annotate an unlimited set of web pages, and keep pages up to date, adding updates. Keepad is simply powered by Keepoint. Keepoint is distributed freely over the internet for all internet users, and is supported by a convenient freeware functionality that allows you to restore pages from your Keepoint temporary or permanent space to access them at any time. - The most important features of Keepoint Keepoint offers you the following: A separate, easy to use space where you can store your

valuable web research. Add as many web pages as you need to the space. Organize your web pages by tags, add tags of your own, or get suggestions from others. Save an unlimited amount of content from the web pages that interest you. Add notes that can be linked to web pages or add links to web pages. Store all your web pages in the "My Pages" space; get a list of pages you have worked on. Store unlimited web pages as "Temp" pages in a page space that will not be deleted as long as you wish. Restore pages from your temporary pages when you want to have access to them. Find web pages based on the search terms you enter. Search the
