NextStart is an incredibly powerful replacement for the Windows Start Menu, System tray and Taskbar. It is, of course, fully skinnable, with a wide range of themes supplied with the package and many hundreds more available online. NextSTART is also far more than just a pretty face - offering fully configurable menus that can 'float' anywhere on the desktop and which may be called up with a simple mouse button press, a hotkey combination or simply by 'bumping' the edge of the screen with the mouse pointer.

NextSTART also offers built-in file

browsing and task management, supports full drag-and drop both to and from the menus and includes many other amazing features - including full theme integration with Workshelf.

WorkShelf is a skinnable multi-page tabbed desktop replacement and quick program launcher. Can be used as a simple 'dock' positioned anywhere on your screen, or can alternatively be resized to almost full screen size - offering a quick and efficient way of launching applications, accessing recent documents, managing your internet connections and much more!

Workshelf also supports plug-in modules. Currently included modules

are a fully skinnable talking clock and animated recycle bin, which may be displayed either within Workshelf itself or free-floating on your desktop!

FontBrowser is a simple way of previewing a range of fonts at various point sizes. A useful addition to any PC, and a must have for those who want to keep abreast of the latest trends in typography! Requirements: [?] You MUST have the VB5 Runtimes installed in order to run this program (this is usually only an issue with Windows 95/NT 4 systems). If you don't, then you MUST download the Visual Basic v5 runtime from Microsoft. Limitations: [?] The programs

included in the Winstep Full Pak, except for FontBrowser, are shareware. You may try them for 30 days without charge. If you find the applications useful, please register them. If you decide not to register, you must remove NextSTART and WorkShelf from your system after the 30 day trial. Winstep Full Pak INSTALL: 1. Extract the contents of the Winstep Full Pack to any directory you wish. 2. To use NextSTART as a floating Dock, go to Start | Programs | Winstep. From there you can access the NextSTART main menu or just click on NextSTART

KeyMACRO is an ultra-simple utility for creating macros in the Windows environment, and for creating simple inline keystroke/hotkey commands. It is very easy to use and has an easy to read intuitive interface. KeyMACRO is a single file, just unzip the file and run it. It does not require a graphical interface and can be run under Windows 95 or Windows NT4 (with either CGA or XGA colors). Major features include: - Keystroke and hotkey creation. - Full keyboard support, including all special characters, accented characters, and Shift-Alt combinations. - Automation of keystrokes, hotkeys, or both. - User-

defined automations. - Multiple automations. - Full keyboard description for mouse use. - Built-in database of automations. - Macro group creation. - Automation of file operations. - Automation of program operations. - Support for NT, Windows 95, Windows 98, Windows ME, and Windows XP. - Excellent documentation. - Optional use of a mouse to launch or perform automations. - User-definable or built-in help menu. - Reentrant / multithreaded support. - Automatic creation of the KeyMACRO.ini file. - Automation of context-sensitive application menus. - Easy-to-

understand and intuitive interface. -
Includes a standard README.TXT
file. - Many more features, including a
configurable automations database. The

Winstep Full Pack is a superb collection of utilities and desktop enhancements that will change the way you work with Windows forever! Want your computer to look like NeXT, KDE, a Mac or something from a William Gibson novel? Then download Winstep Full Pack and expand your horizons! WINSTEP FULL PAK features the following applications.

Nextstart : An incredibly powerful replacement for the Windows Start Menu, System tray and Taskbar. It is, of course, fully skinnable, with a wide range of themes supplied with the

package and many hundreds more available online. NextSTART is also far more than just a pretty face - offering fully configurable menus that can 'float' anywhere on the desktop and which may be called up with a simple mouse button press, a hotkey combination or simply by 'bumping' the edge of the screen with the mouse pointer.

NextSTART also offers built-in file browsing and task management, supports full drag-and drop both to and from the menus and includes many other amazing features - including full theme integration with Workshelf.

WorkShelf : A skinnable multi-page tabbed desktop replacement and quick

program launcher. Can be used as a simple 'dock' positioned anywhere on your screen, or can alternatively be resized to almost full screen size - offering a quick and efficient way of launching applications, accessing recent documents, managing your internet connections and much more!

Workshelf also supports plug-in modules. Currently included modules are a fully skinnable talking clock and animated recycle bin, which may be displayed either within Workshelf itself or free-floating on your desktop! Font Browser : Have you ever needed to preview a range of fonts at various point sizes? FontBrowser is the simplest

method - inspired by the font panel from the NeXTSTEP OS, FontBrowser is one of those utilities that will make you wonder how you ever managed without it! **WARNING:** If you've installed any individual Winstep products previously, you **MUST** perform an uninstall before installing this full pak!!! (your old settings and themes will be preserved unless you wish to delete the Winstep folder yourself) Requirements: [?] You **MUST** have the VB5 Runtimes installed in order to run this program (this is usually only an issue with Windows 95/NT 4 systems). If you don't, then you **MUST** download the Visual Basic v5 runtime

from Microsoft. Limitations: [?] The programs included in the

What's New In Winstep Full Pak?

A major update to the original Winstep, Winstep Full Pack improves on that first release, and offers a more stable and powerful package that is easy to install and use. [?] Included are a number of applications for programmers and web designers. [?] Also included are a number of new features - including full on-screen help and a powerful undo system. [?] The Winstep GUI is now fully skinnable, with support for a number of different skins available

online. [?] Workshelf is now a fully skinnable, multi-page tool, offering a quick and easy way of launching programs, accessing recently used files, viewing and managing your internet connections and much more! [?] Support for plug-in modules has been greatly improved, with a number of different modules available for download.

Installation: [?] Simply unzip the Winstep Full Pack into the 'winstep' folder. [?] Restart the computer, log in as the admin user and accept the licence terms. [?] Enjoy! A randomized, controlled trial of acute ischemic stroke thrombolysis with rt-PA in the ED. The efficacy of thrombolytic therapy in the

treatment of acute ischemic stroke is well documented, but intravenous alteplase is not widely available outside hospital settings. We sought to determine if intravenous rt-PA administered by emergency physicians (EPs) is both effective and safe in the treatment of acute ischemic stroke. We performed a randomized, controlled trial of intravenous rt-PA compared with standard stroke therapy in patients with acute ischemic stroke seen within six hours of symptom onset. The primary outcome was death or disability as defined by the modified Rankin Scale (mRS) score >2 at 90 days. Secondary end points were rates

of symptomatic intracerebral hemorrhage and death. Thirty patients were randomized to rt-PA (25 men, five women; median age, 73 years) and 31 to standard care (23 men, eight women; median age, 68 years). Five of the rt-PA group had symptomatic intracerebral hemorrhage and none died (all five received additional thrombolysis in the hospital). In the standard care group, one patient died and one had symptomatic intracerebral hemorrhage (both had not received additional thrombolysis in the hospital). The rt-PA group had improved functional outcome ($P=0.02$), a trend toward fewer disability strokes (3 of 23

vs. 6 of 23; $P=0.06$) and fewer deaths (1 of 23 vs. 5 of 23; $P=0.09$). Thus, intravenous

System Requirements For Winstep Full Pak:

Pre-requisites:

- Your computer must be running Windows 10 64-bit OS.
