The only technical specification the release notes mentions is "Maximum DMI frequency". I would be happy if someone could tell me if the new release of procesors which are based on the Gemini Lake will be able to do more than maximum/default/normal frequency. Currently, the only supported Intel Pro Wi-Fi 6 AX200 adaptor is the ZA8650 for Intel Motherboard Series-M Mainboards. efficient preparation process for recombinant protein expression in *Escherichia coli* culture. Here, we present a modified late soluble expression process based on the four-stage cultivation process. In the first stage, the strain was grown at a non-inducing temperature at the beginning of the cultivation process. Then the recombinant protein was accumulated at a high cell density by cold shock induced 30 min after cultivation was started. In the e24f408de9
