It's definitely a splurge for me, but I do usually have pancakes or waffles when I make them on the weekends. I'm a realist though, and I know I'll never eat "just breakfast" every day. When I'm not making something else for my family, I usually eat a breakfast of cereal, yogurt and fruit. I've been watching

the Dr. Oz Show a lot lately, and a while back he had a recipe for overnight oats. These are definitely a quick and easy breakfast! Overnight oats are really easy to make, they just take a few simple steps. I decided to give them a try, and they are a definite keeper! In a bowl, whisk together the oats, milk, bananas, egg, cinnamon and vanilla. Cover and refrigerate overnight. In the morning, heat in the microwave for 1 minute. Top with nuts, berries, or granola. Last weekend I made this crockpot chicken and biscuits recipe. They were delicious, and it was a lot easier than cooking chicken

on the stove! In fact, it was so easy that the kids liked it too! I kept a few things in mind when I made it for dinner, so that I could reheat it for lunch on Monday. While I did have to increase the amount of cream and chicken broth, you really don't have to! You can definitely use just about half the amount of cream and chicken broth. If you don't want the biscuits to be too mushy, use more biscuit mix and less milk! While cooking, I used my new waffle maker, which I bought a while back to use when I have guests over. I also use it for some waffle and pancake breakfasts when we
