
How To Use Resorep

Link to Resorep software: [Link to the DDS plugin](#). [Link to the DDS plugin](#). This is a plugin for RStudio (on Ubuntu) This script creates a DDS file that can be opened in RStudio to see the data. It won't be very useful to read in plain text, but you can get an idea that the data has been formatted. This example reads the data into lines in a file and then converts it to a matrix for viewing in RStudio. I hope you can add this to your file and if you have problems with it please email me.
