Although Photoshop only has one main interface, there is a Menubar located on the left side of the screen. The Menubar contains five icons: The primary use menu offers a lot of options that can be used in a variety of ways. The Filters menu offers filters and presets that are commonly used in photography and allow the user to quickly make a photo look a certain way. The History menu allows the user to see different versions of an image at the point in time when the user most recently worked on the image. The Adjust menu allows the user to control aspects of colors, brightness, contrast, and so on. The Options menu offers a variety of options to the user, for example the Width of a pixel, the type of font for text, and the settings for drawing a shape. The others are typically not very useful unless the user is really experienced with Photoshop. There are also shortcut keys labeled F1 through F12, that can be used in the same way as a keyboard's F1-F12 keys. By pressing a key, a specific feature will be activated, such as the keyboard's Print Screen key. Following is an overview of how to use the main features of Photoshop. Q: Is the meaning of "transformed in something" the same in all languages? For example, let's say I have a sentence: The teacher transformed me in a better version of me. Could I also say: The teacher made me a better version of me, or The teacher made me better. ? A: "Transformed me in a better version of me" is not really clear. Maybe if you explain what you mean, I can help with a better definition. If I'm guessing, you just want to say that the teacher made you a better version of yourself. If you want to convey a much more developed version of you, and if a "better" version means a stronger version of you, you could say The teacher turned me into a stronger version of me. But it is worth noting that turning into a stronger version is a bit unusual, in that you usually turn into someone who is stronger than you are now. If you need to express the teacher made you into something more powerful than yourself, you could say The teacher turned me into a stronger version of myself. A: To me, it would imply that the teacher in some way changed the qualities of your self in a more positive way. For example, he or she could have enhanced your talents, improved your personality, taught you a new skill, or released you from a limitation.
